

# Weekly Disease Surveillance Report

2022 Reporting Week 26: June 26 - July 2

This weekly report is produced by the DOH-Okaloosa Epidemiology Section to provide situational awareness to community partners. Data is subject to change as additional information is gathered.

## COVID-19 & ILI Trends

In Okaloosa, COVID-19 cases and percent positivity have slightly decreased this week, although overall those values are elevated. The [COVID-19 Community Risk \(Transmission\) Level](#) and [COVID-19 Community Level](#) indicators have remained HIGH this for Week 26.

Influenza-like illness (ILI) activity increased this past week to over 4% and continues to remain above the normal trend for this time of year (average 1.5%). Please see page 3 for information on ILI numbers in Okaloosa County.

## COVID-19 Resources

The CDC has developed a [Quarantine & Isolation Calculator](#) to help individuals determine how long to isolate, quarantine, or take other steps to prevent the spread of COVID-19.

A new federal [Test to Treat](#) program gives people a fast and easy way to get lifesaving treatment for COVID-19. Through this program, if individuals test positive for COVID-19, they may be eligible to receive a prescription and have it filled all at one location. Individuals can also bring home testing results get evaluated by a healthcare provider for treatment.

Please visit the CDC's websites for COVID-19 [vaccinations](#) and, specifically, [booster](#) shots to stay informed with the most current information, and please continue to promote the COVID-19 vaccine as it is highly effective at preventing severe disease and death.

# Influenza-Like Illness

Week 26: June 26 - July 2

Influenza-like Illness (ILI) is defined as fever greater than or equal to 100°F AND cough and/or sore throat in the absence of another known cause.

**Figure 2:** Annual comparison of the percent of all hospital ED visits due to ILI for Okaloosa County for the 2018-19, 2019-20, 2020-21, and 2021-22 influenza seasons by week. Data source: ESSENCE

**ANALYSIS:** During Week 26, flu reporting partners and ESSENCE (a syndromic surveillance system) reported an increase in ILI activity for Okaloosa County. The percentage of ILI ED visits in Okaloosa County increased from 3.20% during Week 25 to 4.10% during Week 26. Flu partners reported no positive rapid flu tests this week. Over the past three weeks, 9 out of 163 influenza specimens submitted to the state lab were positive (6 Influenza A unspecified, 3 Influenza A H3). There were no ILI admissions, outbreaks, or deaths reported by flu partners this week. The percentage of total ILI ED visits for Week 26 is higher than that of Week 26 last year.

*Note:* Other respiratory syndromes can be represented by increased ILI case numbers. Data Source: ESSENCE
